MEET EZOPRINT

EzoBord delivers a transformative experience that brings art and culture into working spaces by unveiling its latest collaboration with Robin Sprong.

Robin Sprong, an award-winning bespoke wallpaper, and surface design studio based in South Africa, showcases modern innovative aesthetics with a diverse portfolio of designs created in collaboration with talented artists, designers, illustrators, and photographer. The Robin Sprong Collection captivates with its wide range of inspirations, from natural elements to biophilia, and from modern contemporary to culturally rich creations. This unique approach fosters a creative synergy that allows young designers to create bespoke pieces in their own distinctive styles.

Design any workspace with custom printed acoustic panels featuring designs from the Robin Sprong Collection. The EzoPrint process uses dye sublimation to apply these beautifully stunning designs in various thicknesses and configurations.

The Robin Sprong Collection by EzoBord promises to elevate the aesthetic and functionality of any workspace, providing a seamless integration of art, culture, and acoustic performance.

ENVIRONMENT

Our Commitment to the Environment

There are approximately 50 billion water bottles consumed around the world each year, and only about half of those get recycled. The rest end up in landfills, littered through our neighborhoods, or floating in our oceans.

Bottled water consumption has more than doubled since 2000; in 2015 there was the equivalent of more than 5 bottles of water consumed for every person in the USA every single week. This, of course, means that the amount of oil required to produce the energy used for the water bottling process continues to grow.

In 2007, the last year global statistics of oil consumption were available, between 32 million and 54 million barrels of oil were used to produce the bottled water that was consumed in the USA alone. This energy is used to make the bottles from PET pellets (1 million tons in the USA), treat water, bottle the water, label the bottles, and transport the bottled water. Most of the energy consumption occurs in the creation of the bottles themselves. To help in the lifecycle of this plastic product, we have chosen to manufacture our material so that it recycles these PET bottles. We are doing our part to reduce the waste. This acoustical and tackable material is made from PET bottles in a zero-waste process with postindustrial recycling. An environmentally friendly, sustainable, and waste reduced alternative to traditional acoustical/tackable material that looks great in any office, education, or open space installation.

EzoBord is

- low VOC
- formaldehyde free

DID YOU KNOW...

For every pound of recycled PET bottles (approximately 23) energy use is reduced by 84% and greenhouse gas emissions are reduced by 71%.
