

EzoFelt and EzoLayer Care & Cleaning Instruction

IMPORTANT: the following instructions are for EzoFelt materials only. Refer to cleaning instructions for other materials separately.

RECOMMENDED CLEANING SOLUTIONS

- Warm distilled water
- Mild solution of a color safe laundry detergent

RECOMMENDED CLEANING STEPS

1. To prevent dust build-up, lightly dust with a soft cloth or vacuum with a soft brush or light application of compressed air. Do not use a powered brush attachment as this may distort or dislodge fibers.
2. For Spot Cleaning always test on an inconspicuous area prior to commencing cleaning.
3. Blot any excess spills from the material with a dry clean sponge or cloth
4. Most marks can be spot cleaned by lightly wetting the affected area with warm distilled water. If necessary, a mild solution of warm distilled water and a mild color safe detergent can be used. Do not saturate the material. Do not scrub as this will affect the surface finish
5. Avoid the use of carpet shampoos and solvent based cleaners.
