Pricing for custom nets as quoted. Design limitations in addition to those listed may apply. Custom nets available with undulation bottom or top and bottom as well as irregular shapes.

TYPICAL DESIGN LIMITATIONS NOTED:

- Minimum panel height at any point within the unit is 6"; maximum 24", pending overall design.
- ezoBord may recommend 12mm (1/2") thick material specifically to accommodate design and engineering requirements.
- Cell density affects structural integrity and suspension point availability, as well as price. Some designs may require specific cell density. Standard cell density is 8" and custom cell densities may be available depending on net design.

Accommodation for HVAC and other ceiling details is possible and requires exact locations and dimensions. It is strongly recommended to confirm building code restrictions within your area. ezoBord and its distributors assumes no liability for inaccurate drawings or non compliance of local building code.
