

With Rail we are going beyond illumination for interior spaces. True to our acoustic roots, we incorporate the performance of EzoBord material to LED technology providing a synergistic relation between acoustics and lighting as a solution to high-end noise levels, reverberation and poor lighting issues common to open spaces. Designed in collaboration with Metalumen, Rail comes with a variety of light color temperatures and as a mix with our classic Baffle Systems ("Vesi" and "Veldi").

#### COMPOSITION

100% PET (min. %50 recycled content)

#### **PRODUCT VARIANCES**

Variation in fiber mix and colour may occur. All products will be supplied within commercial tolerances.

#### FIRE TESTING

#### NORTH AMERICA:

ASTM E-84 Class A\*
CAN ULC S102-10

#### EUROPE AND UK:

• EN13501-1: 2007

#### ACOUSTICS

Refer to ASTM C423 test chart for specific

absorption rates/frequency.

• 3⁄8" (9mm): NRC 0.75 (subject to mounting conditions and geometrical properties)

 $\cdot$   $\frac{1}{2}$ " (12mm): NRC 0.85 (subject to mounting conditions and geometrical properties)

(subject to mounting conditions and geometrical properties)

#### ENVIRONMENT

Made of polyester fiber, min. 50% of which comes from recycled water bottles which contributes to LEED MR Credit and BREEAM Health and Wellbeing, Materials points due to recycled content, acoustic performance, and low emitting materials. No VOC's: CDPH v1.2 and REACH SVHC Compliant.

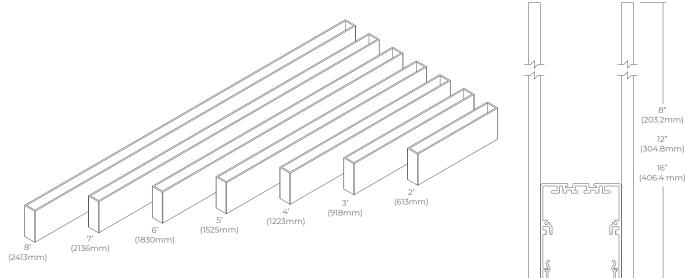

#### **PRODUCT VARIANCES**

Variation in fiber mix and color may occur. All products will be supplied within commercial tolerances.

#### GENERAL

Tackable, impact resistant, bacteria resistant, moisture resistant, installation friendly.

#### PAINT FINISHES

Satin aluminum, white and black are standard finishes. For custom finish, contact factory.

#### MOUNTING

Aircraft cable yoke complete with a Quick-Grip field adjustable suspension system. Threaded rod for t-bar and unistrut metal framing system.

#### ELECTRICAL

Factory prewired with easy wire quick connect sections.

#### DRIVERS

Metalumen offers 0-10V dimming\* as a standard on our entire LED product offering. Dimming range is 1%-100%. Power factor is > 90%. Class 2 rating. Drivers are integral.

#### APPROVALS

All components are UL/ CSA/QPS recognized or listed. RoHS compliant. This product is cULus listed.

#### ENVIRONMENT

Suitable for dry or damp locations.

\*Standard drivers compatible with passive/ sinking dimmers. Please contact Metalumen if active/sourcing dimmer support is required.

# ENVIRONMENT

#### Our Commitment to the Environment

There are approximately 50 billion water bottles consumed around the world each year, and only about half of those get recycled. The rest end up in landfills, littered through our neighborhoods, or floating in our oceans.

Bottled water consumption has more than doubled since 2000; in 2015 there was the equivalent of more than 5 bottles of water consumed for every person in the USA every single week. This, of course, means that the amount of oil required to produce the energy used for the water bottling process continues to grow.

In 2007, the last year global statistics of oil consumption were available, between 32 million and 54 million barrels of oil were used to produce the bottled water that was consumed in the USA alone. This energy is used to make the bottles from PET pellets (1 million tons in the USA), treat water, bottle the water, label the bottles, and transport the bottled water. Most of the energy consumption occurs in the creation of the bottles themselves. To help in the lifecycle of this plastic product, we have chosen to manufacture our material so that it recycles these PET bottles. We are doing our part to reduce the waste. This acoustical and tackable material is made from PET bottles in a zero-waste process with postindustrial recycling. An environmentally friendly, sustainable, and waste reduced alternative to traditional acoustical/tackable material that looks great in any office, education, or open space installation.

#### EzoBord is

 $\cdot$  formaldehyde free

#### DID YOU KNOW ...

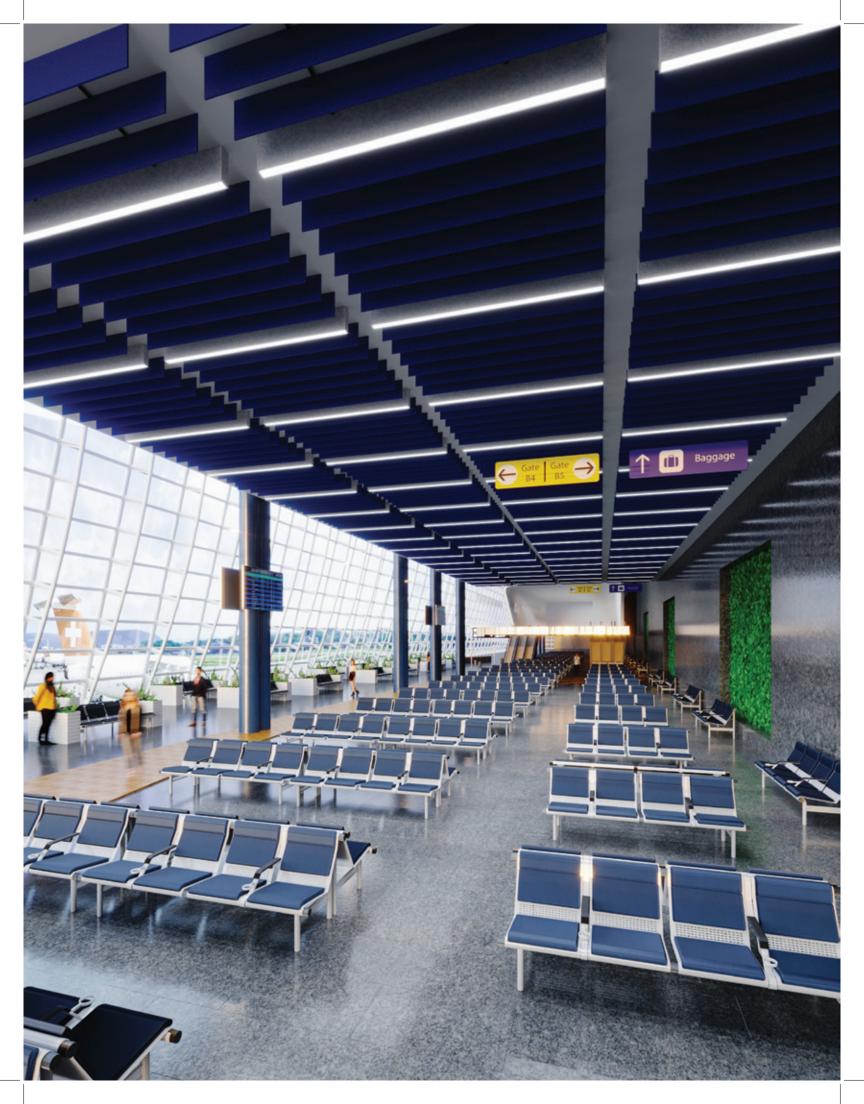

For every pound of recycled PET bottles (approximately 23) energy use is reduced by 84% and greenhouse gas emissions are reduced by 71%.
