TAC PANEL

EZO TAPE

*Images select typical hardware options. Please refer to packing list for items & quantities specific to your order

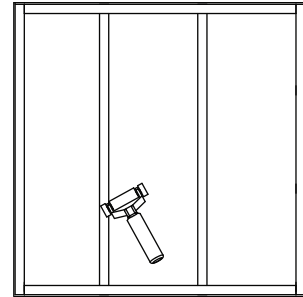

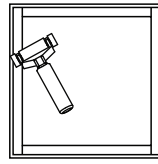

RECOMMENDED TOOLS

Level - Laser - Roller - Knife - Construction Grade Adhesive

INSTALLATION INSTRUCTIONS

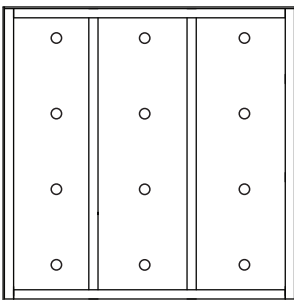

TAC PANEL

- Apply Ezotape to outer edges of reverse side of the Tac Panel approximately 1/8" inset from edge.
Apply Ezotape in vertical direction every 16" for 3/8" (9mm) thick panels and 12" for 1/2" (12mm) panels.

- Use roller to burnish tape ensuring proper adhesion.

- Locate placement on wall, level and mark with pencil.

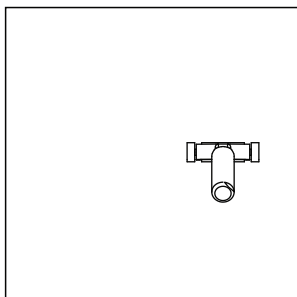

- Remove backing from tape and apply construction adhesive to the backside of the panel as required

Construction adhesive is recommended when:

- A) Panels weight more than 10 lbs. (Note: Most panels that are 12mm or thicker should use adhesive)
- B) Panels are applied to a ceiling
- C) Surface or enviromental conditions are present that may limit the bond strength of EzoTape
- D) A stronger and more permanent bond is required

**Construction Grade Adhesive must be provided by the client.*

- Apply panel to wall in the marked location and press firmly to engage the EzoTape and construction adhesive if applicable. Use weighted non marking roller for best results.
